

BCIS Billing and Collection System

User Manual

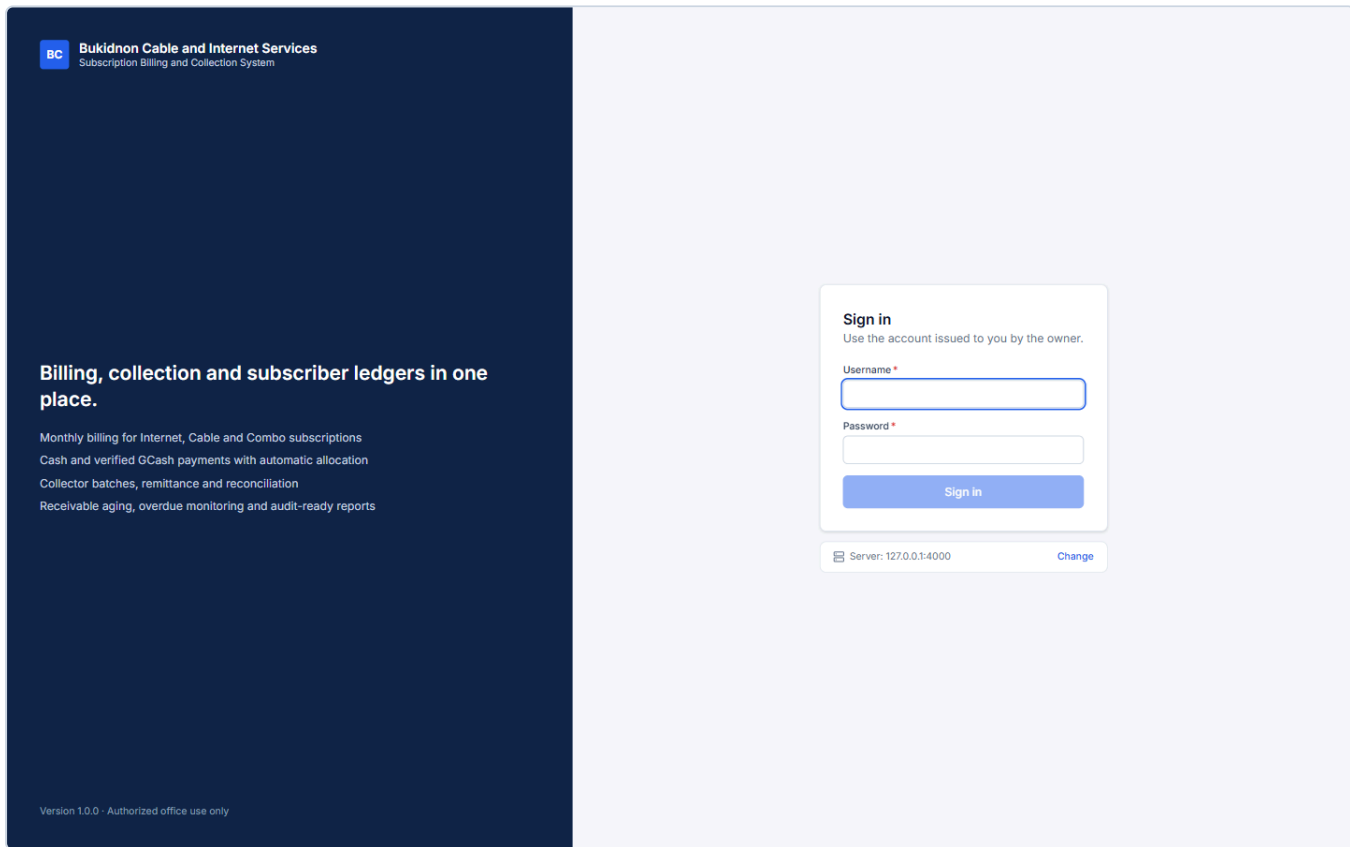

For office staff of Bukidnon Cable and Internet Services: owner, administrator, cashier, collection supervisor, accounting, technician and viewer.

Version 1.0.0

1. Getting Started

1.1 Signing in

1. Open **BCIS Billing** from the desktop shortcut.
2. Type the username and password given to you by the owner, then click **Sign in**.

BC Bukidnon Cable and Internet Services
Subscription Billing and Collection System

Billing, collection and subscriber ledgers in one place.

Monthly billing for Internet, Cable and Combo subscriptions
Cash and verified GCash payments with automatic allocation
Collector batches, remittance and reconciliation
Receivable aging, overdue monitoring and audit-ready reports

Version 1.0.0 - Authorized office use only

Sign in
Use the account issued to you by the owner.

Username *

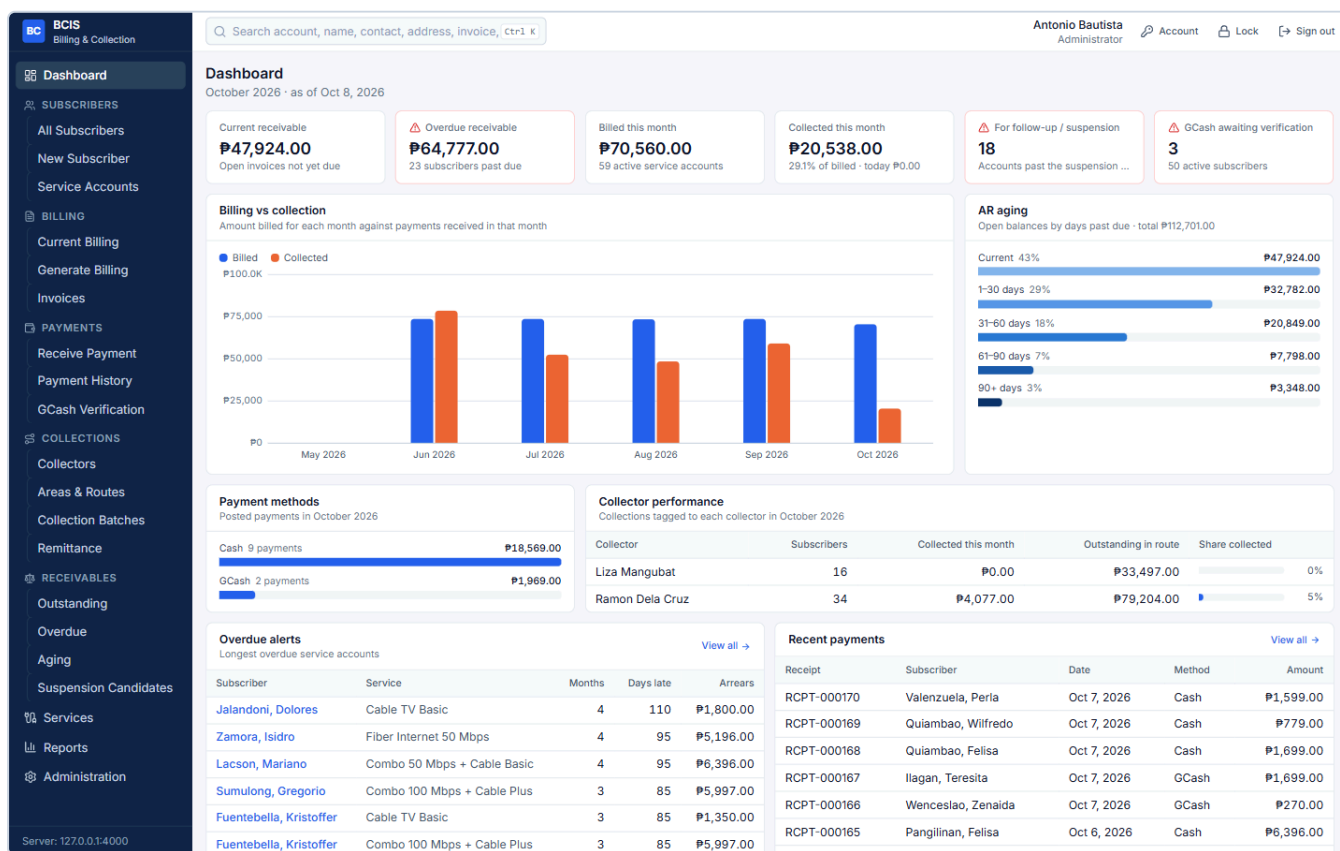

Password *

Sign in

Server: 127.0.0.1:4000 [Change](#)

- After several wrong passwords the account is locked for a few minutes. Wait, or ask the owner to reset your password.
- **Server: ... Change** under the form shows which server PC this computer talks to. Only change it when told to (see Troubleshooting).

1.2 The screen

- **Left menu** — only the items your role may use are shown.
- **Search box (Ctrl+K)** — finds a subscriber by account number, name, contact number or address, and also invoice numbers, receipt numbers and GCash reference numbers.
- **Top right** — your name and role, **Account** (change your password), **Lock** and **Sign out**.

1.3 Locking and signing out

- Click **Lock** when you step away. The session also locks by itself after a period without activity. Type your password to continue.
- Click **Sign out** at the end of your shift. Never share your account: every action is recorded under your name.

1.4 Reading the tables

Every list works the same way: type in the search box, choose filters, click a column heading to sort, use the arrows at the bottom to change page, and click **CSV** to export the rows shown. Click a row to open it.

Amounts are in Philippine pesos. Statuses always show a word as well as a colour, for example **Overdue**, **Partially Paid**, **Shortage**.

2. Subscribers

2.1 Registering a subscriber

1. **Subscribers > New Subscriber.**
2. Fill in name, contact number, due day (1–28), collection area and collector, and the address.
Fields marked * are required; mistakes are shown under the field.
3. Optionally choose the **first service account** (plan and activation date).
4. Click **Register subscriber**. The account number (for example BCIS-00051) is assigned automatically.

2.2 The subscriber profile

Open a subscriber from **All Subscribers** or from the search box.

BCIS Subscription Billing and Collection System · page 4 of 20

Tab	What it shows
Documents	GCash proofs on file
Audit	Who changed what on this subscriber (authorized roles)

A subscriber is never deleted. To close an account, terminate its services, then use **Edit > Status** and give the reason.

2.3 Adding a service account

Profile > **Services > Add service**. Choose the plan, the installation address (or enter another one), activation date, billing start date and due day. A subscriber may have several services at different addresses.

3. Billing

3.1 Generating the monthly billing

1. **Billing > Generate Billing.** Choose the billing period.
2. The preview shows how many service accounts will be billed, how many are already billed (skipped) and the total.
3. Choose **Generate and finalize** (normal) or **Create drafts for review.**
4. Click **Generate.**

The screenshot shows the 'Generate Billing' interface of the BCIS Billing & Collection system. The left sidebar contains a navigation menu with categories: SUBSCRIBERS, BILLING, PAYMENTS, COLLECTIONS, RECEIVABLES, Services, Reports, and Administration. The 'Generate Billing' option is highlighted under the BILLING category. The main content area has a search bar at the top and a user profile for Antonio Bautista. Below this, the 'Generate Billing' section includes a description, a billing period dropdown set to 'October 2026', and two radio buttons for 'Generate and finalize' (selected) and 'Create drafts for review'. Summary statistics show 1 service account to be billed, 58 already billed (skipped), and a total amount to bill of ₱650.00. A 'Generate 1 invoice' button is present. A preview table shows one invoice for service account SA-000007, subscriber Macaraeg, Emilio, for Cable TV Plus in October 2026, with a due date of Oct 5, 2026, and a total of ₱650.00.

Service account	Subscriber	Line items	Due date	Total
SA-000007	Macaraeg, Emilio	Cable TV Plus - October 2026 ₱650.00	Oct 5, 2026	₱650.00
Total				₱650.00

- It is safe to run the generation again: accounts that already have an invoice for the month are skipped, so no duplicates are created.
- Drafts are not yet in the ledger. Review them under **Invoices**, then **Finalize drafts** or **Discard drafts**.
- If a subscriber has advance credit, it is applied to the new invoice automatically.

3.2 Invoices

Billing > Invoices lists all invoices. Click one to see the details.

Void Adjustment Print Close

A finalized invoice cannot be edited. To correct it:

- **Adjustment** — add a credit (reduce the balance, for example a rebate) or a debit (add a charge). A reason is required.
- **Void** — cancel the whole invoice. Not possible while payments are applied to it; reverse those payments first.

4. Payments

4.1 Receiving a payment

1. **Payments > Receive Payment.** Type the subscriber's name or account number and press Enter.
2. Check the name, **Total due** and **Overdue**.
3. Type the **amount received**, or click **Total due / Overdue only**.
4. Choose the payment method. A reference number is required for anything other than cash.
5. Read the **Allocation preview**: it shows which invoices the money goes to (oldest first) and what remains.
6. Click **Post payment** (or press Ctrl+Enter), then **Print receipt**.

4.2 Correcting a wrong payment

A posted payment cannot be edited or deleted. If it is wrong, an authorized user opens it in **Payment History**, clicks **Reverse payment** and types the reason. The original payment stays in the list marked *Reversed*, the receipt becomes *Void*, the balances go back, and the correct payment is posted as a new receipt.

5. GCash Verification

A GCash screenshot is **evidence to check**, not proof of payment. The account is credited only after verification.

Recording a proof (cashier):

1. **Payments > GCash Verification > Record GCash proof.**
2. Find the subscriber, type the reference number, sender name and number, amount and date, and attach the image.
3. Click **Submit for verification**. Nothing is posted yet.

Verifying (administrator / owner):

1. Open the **Pending** list and click a proof. The image is on the left, the details on the right.
2. Check the reference number, amount and date in the GCash app or merchant history.
3. Click **Verify and post**, or **Reject** with a reason.

The screenshot shows the BCIS Billing & Collection System interface. The sidebar on the left contains navigation links: Dashboard, SUBSCRIBERS (All Subscribers, New Subscriber, Service Accounts), BILLING (Current Billing, Generate Billing, Invoices), PAYMENTS (Receive Payment, Payment History), GCash Verification (highlighted), COLLECTIONS (Collectors, Areas & Routes, Collection Batches, Remittance), RECEIVABLES (Outstanding, Overdue, Aging, Suspension Candidates), Services, Reports, and Administration. The main content area is titled 'GCash Verification' and includes a search bar. Below the title, there's a table with columns for 'Pending (3)', 'Verified', and 'Rejected'. The table lists three entries: Sumulong, Gregorio (Ref 9001000403876 - Oct 8, 2026, Amount: P1,999.00, Status: Pending), Hontiveros, Teresita (Ref 9001000419714 - Oct 7, 2026, Amount: P500.00, Status: Pending), and Raymundo, Oscar (Ref 9001000411795 - Oct 8, 2026, Amount: P999.00, Status: Pending). A 'Duplicate reference' warning is shown for the first entry. To the right of the table, a detailed view of the Hontiveros, Teresita entry is shown, including a placeholder for a screenshot, transaction details (Reference number: 9001000419714, Sender name: Teresita Hontiveros, Sender number: 0918 555 1703, Transaction date: Oct 7, 2026), and a verification section with a 'Verify and post' button and a 'Reject' button.

If the same reference number was already used, the proof shows **Duplicate reference**. When that reference already has a posted payment, verification is blocked.

BCIS Subscription Billing and Collection System · page 12 of 20

6. House-to-House Collection

6.1 Setting up

- **Collections > Areas & Routes** — the collection areas, route notes and a printable **route sheet** per collector.
- **Collections > Collectors** — collectors and the areas assigned to them.
- Each subscriber's area and collector are set in the subscriber's profile.

6.2 Running a collection batch

1. **Collections > Collection Batches > New Batch**. Choose the collector, area and date. The batch loads every assigned subscriber with an amount due.
2. Print the **Route sheet** for the collector.
3. When the collector returns, open the batch and click **Collect** beside each subscriber who paid; enter the amount and method. Use **No payment...** for *Not at home*, *Promised to pay* or *Refused*.
4. Click **Submit batch**.

6.3 Remittance and reconciliation

Open the batch from **Collections > Remittance**.

1. Count the cash the collector turns over, type it under **Cash amount counted** and click **Record remittance**.
2. The screen compares **cash collected** with **cash remitted**:
 - equal — click **Reconcile as balanced**;
 - different — the **shortage** or **overage** is shown in red or amber. You must type the reason before you can reconcile. The difference is recorded exactly as it is.
3. An administrator or the owner ticks the confirmation and clicks **Close batch**.

Notes

Record remittance

Reconcile

Shortage of P500.00
The difference will be recorded on the batch exactly as it is. Explain it to continue.

Reason for the shortage *

Reconcile with shortage

Accounts on this route

Amounts due were fixed when the batch was created.

#	Account	Subscriber	Address	Current	Arrears	Total due
1	BCIS-00005	Macaraeg, Emilio	Purok 5, Mabini St., Casisang, Malaybalay City	P300.00	—	P300.00

Remittance recorded

GCash and other non-cash collections are listed separately and are not part of the cash to remit.

7. Receivables

Screen	Use it to
Outstanding	See every subscriber with a balance, current and overdue
Overdue	Follow up past-due accounts: months unpaid, oldest invoice, last payment, total arrears. Filter by collector, area, plan, service and age
Aging	See balances in Current, 1-30, 31-60, 61-90 and 90+ day columns. The green line confirms the total equals all open invoices
Suspension Candidates	Accounts that passed the grace period and threshold

8. Suspension and Reconnection

1. **Receivables > Suspension Candidates > Suspend** (or from the profile's Services tab). Enter the reason and effective date. Suspended accounts are not billed.
2. When the subscriber has settled the overdue invoices, click **Reconnect** on the service. A reconnection fee invoice is created if the plan has one. Assign a technician.
3. The technician opens **Services > Reconnections** and clicks **Mark completed** after restoring the line. The account becomes Active again.

9. Reports

- 1. **Reports.** Choose a report on the left.
- 2. Set the dates or other options and click **Run report.**
- 3. Click **Print, PDF, XLSX or CSV.**

Backup & Restore

Backups

Each backup holds a PostgreSQL dump, a copy of the payment-proof attachments and a checksum manifest, stored on the server PC.

Create backup now

Type	Name	Created	By	Size	Status	Verification / result	
Backup	bcis-20261007-160545	Oct 8, 2026, 12:05 AM	Olivia Ramos	214 KB	Verified	Checksum OK; archive readable (33 tables)	Verify Restore...

Financial integrity check

Independent cross-checks of invoices, payments, allocations, receipts and ledger balances.

Run check

All checks passed

Checked Oct 8, 2026, 12:05 AM

Check	Rule	Result	Violations
Invoice balance arithmetic	balance = total + adjustments - payments for every finalized invoice	Passed	0
Invoice payments match allocations	amount paid on each invoice equals its non-reversed payment allocations	Passed	0
Invoice adjustments match adjustment records	net adjustments on each invoice equal its posted debit and credit adjustments	Passed	0
No payment value lost	for every posted payment: allocations + unapplied credit = amount received	Passed	0
Ledger reconciles to invoices and credits	each subscriber ledger balance = open invoice balances - unapplied advance credit	Passed	0
Every invoice and payment is in the ledger once	one ledger debit per finalized invoice and one ledger credit per payment, for the same amount	Passed	0
Receipts match payments	every payment has exactly one receipt; reversed payments have a VOID receipt and a reversal record	Passed	0
No duplicate billing	at most one live invoice per service account and billing period	Passed	0
Document numbers are unique	no repeated invoice or receipt numbers	Passed	0
Closed batches carry an explicit variance	reconciled and closed batches record difference = remitted - collected, with a reason when not balanced	Passed	0

Backup verified

10.2 Restore

Restoring replaces **all** current data with the backup. Use it only after data loss or a serious mistake.

1. Make sure no one else is using the system.
2. Click **Restore...** beside a verified backup, type the reason and the word `RESTORE`.

3. The system verifies the backup, saves a safety copy of the current data, restores, and runs the integrity check. Read the result shown at the top.
4. Other users sign in again.

11. Troubleshooting

Problem	What to do
"Cannot reach the BCIS server"	Check the network cable / Wi-Fi. Make sure the server PC is on. On the sign-in screen click Change , check the server address and click Test connection .
"Incorrect username or password"	Check Caps Lock. After several tries the account locks for some minutes. Ask the owner to reset the password.
"Your session has expired"	Sign in again. Sessions end after 12 hours or when the owner changes your account.
"You do not have permission" / a menu is missing	Your role does not include that task. Ask the owner.
A payment was posted to the wrong subscriber or with the wrong amount	Do not try to fix it by another entry. Ask an administrator to reverse it, then post it correctly.
"This service account already has an invoice for that billing period"	The month is already billed for that account. Nothing more to do.
"A posted payment already uses this GCash reference number"	The reference was credited before. Check the earlier receipt; reject the duplicate proof.
The batch cannot be reconciled	Remitted cash differs from collected cash. Type the reason for the shortage or overage.
The receipt did not print	Open the payment in Payment History and click Print receipt , or Save as PDF .
Totals look wrong	Owner: Administration > Backup & Restore > Run check . All checks should pass; if not, contact the developer and do not restore without advice.
